Heavy Duty High Intensity SONICATOR

Ultrasonic Processor for Low and High Temperature Liquids Processing

Applications:

- 1. Homogenization, Emulsification, Mixing
- 2. Extractions from organic and inorganic materials
- 3. Nano-particles & nano-emulsions technologies
- 4. Biodiesel production
- 5. Cells disruptors
- 6. Atomizing low and high viscosity liquids
- 7. Liquids processing on high temperatures (until 250°C)

Technical characteristics:

-20 kHz, variable power & amplitude

-750 W, continuous power, 1000 W pulsed power

-Ultrasonic converter: 3 kW, oversized for heavy duty

-Titanium sonotrodes and boosters selection

-Options for air and/or water cooling for extreme operating conditions

-Options for 230 VAC, 50 Hz, and or 115 VAC, 60 Hz main supply

Choice of different sonotrodes for maximizing and optimizing extraction & homogenization

Spherical-end sonotrode: Uniform axial and radial high intensity mixing; -minimized sonotrode erosion

Step, piston-type horn: Extremely high intensity axial mixing like "ultrasonic torch"

High power converters with air and/or water cooling

Flex Probe Sonicator "88"

Standard Delivery Set

Standard delivery set: Ultrasonic Converter, Booster (only one), Flex-mount Resonator, Spherical Sonotrode and Reactor Vessel-88 with flanges and fast clamps/covers.

Optional (ask for quote): More boosters, Additional Sonotrodes, Different Reactor Vessel.
