Global E-business Ultrasound - Morko

- Ultrasonic Scale Preventer : Type for Non-Hazard-Area (boiler, heat exchanger, condenser, pipe laying, etc.)
- Type for Hazard-Area (oil refining equipment, chemical plant equipment, etc.)
- Ultrasonic device for Dyeing, Washing and Loss of Weight : For Dyeing, Washing and Loss of Weight of textile
- Ultrasonic Vibrator : For equipment & pipe of particulate material, and equipment requiring vibration, etc  
For facilities and pipes treating pulverulent bodies, and facilities required vibration, etc.
- Ultrasonic Power Supply System : Environmental equipment(wastewater treatment, control of pollution), Ultrasonic Birds Exterminator(USP-BD), Ultrasonic Fish Deterrent Device(USP-FDD), improvement of combustion of intermediary oil, cleaning at high temperature, sterilizer, etc.
- Other devices requiring Strong-ultrasonic Energy

› Basic Principle

- Principle of vibration

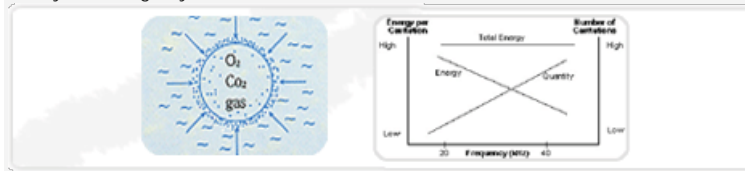

Ultrasound has the fastest speed in metal(first), and second is in liquid(second), and third is in gas(third). Usually, facilities are composed up metal, so the vibration is transferred to the whold facility through metal.  
When an electric current of pulse type is put into Transducer, a magnetic field is formed through electric wires which are wound up on a vibrating element.  
Then the displacement occurs due to the change of a magnetic field, so that the vibration is generated. But the amplitude of the vibration is low exceedingly.

- Cavitation

Ultrasonic cavitation is the formation of bubbles(cavitates) in a liquid at the low-pressure part of wave cycle. The bubbles are filled with gases of vapor coming out of water. When the size of bubbles reaches the saturated size, bobbles are collapsed. The collapse makes the shock wave of high stress in a liquid. During the repeat of creating and collapse of bubbles, the temperature at tens of thousands Kelvin (K) is emitted, but bubbles are too small that the increase of temperature is small exceedingly. This can be conformed by Pilot experiment, but if the experiment is performed at long time, the temperature of the liquid increases a little bit due to other factors. The amount of formed bubbles(cavitation) can be different as per the temperature of the liquid and frequency. In despite of the same frequency, cavitation can be different

according to the structure and thickness of the facility.  
 And it is impossible to use ultrasound to the aluminum, because the aluminum can be easy to damage by ultrasonic waves.

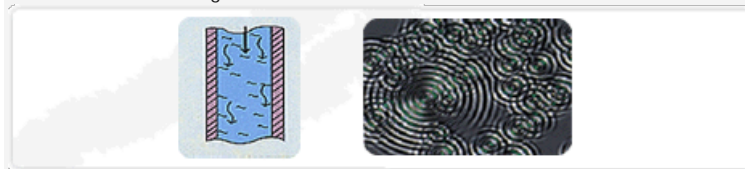

**- Principle of the increase of the surface**

If a particle in a liquid is shattered by ultrasonic waves, surface area enlarges.  
 And the enlarged surface area is bonded othe particles, and then it is shattered.  
 During this process, the particle is shattered minutely.

**- Principle of waves**

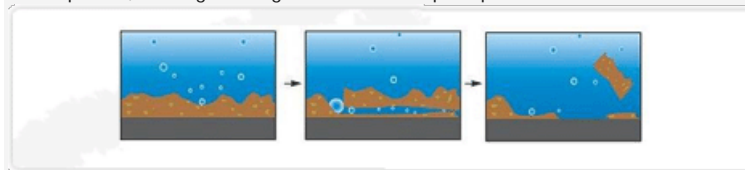

When ultrasonic waves are transferred to a liquid through a metal, a wave motion generates between the surface of the luquid and surface of the metal, so that it prevents that particles and gases are bonded at the surface of the facility, and the transmissioint of the heat becomes good.

**- Principle of the Elimination of Scales**

Scales which are bonded to the surface of the pipe and metal always have a crack.  
 This is due to the difference of the coefficient of thermal expansion of scales and metal.  
 Thermal facilities and all equipment accompany the change of temperature, so it repeats expansion and contraction. During this process, a crack occurs.

Bubbles that are made by cavitation infiltrate the crack, and explode. Due to the energy of explosion, existing scales get fallen as a lump shape.

**- Other Principles**

Although several physical and chemical secondary principles act simultaneously, such principles have less effect than basic principles' effect. So it is not necessary to comment them.

But when ultrasonic waves are applied to the circulation of cooling water, it can be confirmed that concentration of calcium carbonate in cooling circulating water drops remarkably.

◆ Technical Development List ◆

Research subject and contents	Period	Method/Qualitification
Developing Ultrasonic Scale Preventer(USP)	1996.4-2000.8	Morko's own development
Developing Ultrasonic sewing processor	1999.6-1997.11	Subject for technical development of small and medium companies (Supervision: Korea Institutue of Industrial Technology(KITECH)) /Participant company
Technologies for preventing scale and preventing scale and slime of cool water at a freezing equipment by ultrasonic waves.	1998.7-1999.10	Subject for technical development of small and medium companies (Supervision: Korea Institutue of Industrial Technology(KITECH)) /Participant company
Research on liquor-flow loss weight technology development of polyester textile by combing ultrasonic wave	1999.1-1999.12	Subject for development(Supervision: Korea Textile Development Institute)/Participant company
Researching partition & increase process for making a high level fine-conjugate fiber	2000.1-2000.12	Subject for development(Supervision: Korea Textile Development Institute)/Participant company
Developing Ultrasonic Welder and applied technology.	1999.5-2001.4	Development work for industrial basic technology(Consignation: Korea Institutue of Industrial Technology(KITECH))/ Superintendant company
Developing liquid dying technology and equipments by combining magnetostrictive type of ultrasonic equipment.	1999.6-2000.5	Subject for developing industrial basic technology(Consignation: Yeungnam university)/ Superintendant company
A method for anti-access of fishes and shellfishes to the around of cooling water inflow area in power plantusing ultrasonic waves	1999.10-2000.9	Morko's own development
Improving fuel by using ultrasonic wave of magnetostrictive transducer	1999.7-2001.9	Development work for technology of energy saving(Consignation: Korea Institute of Energ Research)/ Superintendant company
Developing Ultrasonic sterilizer	1999.7-2000.4	Development work for technology of venture company and small & medium company(Consignation: Center for Emergency Imformatics)

		Superintendant company
Developing Ultrasonic Birds Exterminator	2000.5-2001.8	Morko's own development
A apparatus of surface-modifying for waste-rubber using ultrasonic cyclic horn type	2000.6-2003.5	with Gyeongsang National University(participating research)
Developing Ultrasonic Scale Preventer of Explosion-Proof type	2004.7-2005.5	Morko's own development (Consignation: Korea Testing Laboratory)

## Overview

### Welcome to Morko

- Pursuit of the World Leading Company
- Continuous Research & Development
- Contribution for National Development
- Striving for Mankind
- Shearing for being together

We specialise in research, development, manufacture and export of Ultrasonic scale preventer (USP) by using strong ultrasonic technology. With dynamic ultrasound energy, we are able to deliver a product that brings great energy savings, reduced operation cost and increased production capacity for all our valued customers.

Morko Co. is the founder and originator that own the patent and trademark to the intellectual property of Ultrasonic Scale Preventer Technology. We hold exclusively the explosion-proof certificates in Korea for production of USP and by far the only sole manufacturer for this technology. Our USP is a truly tested and proven product for various heat exchangers, boilers, piping etc..

Over the years, we have successfully installed USPs to many satisfied customers in Korea, Asia and other parts of the world for the chemical and oil & gas industries in helping them with their fouling issues.

We forge very strong & long term partnership with our clientele, besides providing very strong technical sales and after sales support, we are relentless in our R&D effort to continuously upgrade and improve our USP.

## → History

### » 2013 History

Revised & registered the trademark "USP", Ultrasonic Scale Preventer.  
 Certified the UL/cUL in hazardous area(E355390) for the special USP model(USP-300-UL & Transducer) by MORKO INTERNATIONAL.  
 Extended the Ultrasonic Degreasing Cleaning System to Oversea Hyundai Motors Plant in Sichuan China

### » 2012 History

Revised & registered the patent No.10-1133848, Ultrasonic Scale Preventer for Heat Exchangers.  
 Extended the USP business to PTT Group(PTTGC4 / PTTGC5 / PTTI1 / PTT Oleo) in Thailand.  
 Revised the Ex-proof certification of Ex-proof USP by Korea Gas Safety Corporation.  
 Extended the USP business to Shell in Canada.

### » 2011 History

Started the USP business with Shell Global and installed Ex-proof USPs to Shell-Bukom/ laboratory in Bangalore / Shell Philippines & assigned the Shell Global as the Key account.  
 Extended the USP business to Petron in Philippines

### » 2010 History

Installed the USPs to RAPP, world's largest paper & pulp plant in Indonesia. Installed the Ex-proof USPs to Exxon-mobil Singapore as trial & Extended the USP business to SRC in Singapore for Vis-breaker heat exchangers

### » 2009 History

Restructured the MORKO Co. LTD company as MORKO Co. which is the local business & production and MORKO INTERNATIONAL which is the oversea business development & sales/marketing.  
 Installed the Ex-proof USPs to SRC(Singapore Refining Company) for the CDU heat exchangers in Asia Pacific area.  
 Established the MORKO Rep Office in Singapore to explore the oversea USP business development.  
 Started the deliveries of Ex-proof USPs to various Gas & Oil AP customers such as IRPC, PTT Group, Siam Mitsui in Thailand.

### » 2008 History

Co-developed the Ultrasonic Degreasing Cleaning System with Hyundai Motors for the automotive production facilities as standard process & delivered the 2 systems for the Hyundai Motors Jeonju Plant.  
 The 36 sets of Ex-proof USP model are installed in the S-Oil(ARAMCO) refinery for the CDU heat exchangers after the trials since 2005.

### ▷ 2007 History

Registered the patent No.10-0764819, Ultrasonic Scale Preventer for the Hazardous(Ex-proof) Area.

### ▷ 2006 History

- 2006. 01 Obtained ISO 14001:2004 / KS A 14001:2004
- 2006. 01 Acquired NEP(New Excellent Product) mark on USP by Ministry of Commerce, Industry and Energy, Republic of Korea
- 2006. 03 Obtained the Certificate of Excellent Product on USP from Public Procurement Services: Republic of Korea
- 2006. 06 Designated as [Prospective Export Business](#) by Export Assistance Center in Daegu-Gyeongbuk Small and Medium Business Administration[SMBA](No. 2006-55)

Started the commercial deliveries of Ex-proof USP models to various petro & petrochemical companies such as GS-Caltex, SK-Energy, Kumho PNB Chemical, Samsung Precision Chemical etc...

### ▷ 2005 History

- 2005. 05 Ultrasonic Generator (Passing the performance test for Explosion Area by Korea Testing Labortory[KTL])
- 2005. 07 Obtained approval for [Venture Business](#) from Daegu-Gyeongbuk Small Medium Business Administration[SMBA](No. 051325232-4-0205)
- 2005. 10 Certification of all models of USP as [Water Treatment Facility\(Accoustic\)](#) by Korea Energy Management Corporation[KEMCO] at the first time in Korea

### ▷ 2004 History

- 2004. 07 Designated as [Prospective Export Business](#) by Export Assistance Center in Daegu-Gyeongbuk Small and Medium Business Administration[SMBA] (No. 2004-7)
- 2004. 08 Magnetostrictive Transducer (Passing the performance test for Explosion Area by Korea Testing Labortory[KTL])

### ▷ 2003 History

- 2003. 01 Designated a company to get support for export by Daegu-Gyeongbuk Small Medium Business Administration[SMBA]
- 2003. 01 Acquiring [ISO 9001](#)
- 2003. 05 Made an agreement for distributor in Turkey and exported USP
- 2003. 07 Obtained approval for [Venture Business](#) from Daegu-Gyeongbuk Small Medium Business Administration[SMBA] (No. 031325232-3-0167)

### ▷ 2002 History

- 2002. 07 Designated as [Prospective Export Business](#) by Export Assistance Center of Daegu-Gyeongbuk Small and Medium Business Administration[SMBA] (No. 2002-133)
- 2002. 10 Received 2002 [Medal of Prime Minister](#) from Korea Industrial Technology Association
- 2002. 11 Moved the factory

### ▷ 2001 History

- 2001. 07 Obtained approval for [Venture Business](#) from Daegu-Gyeongbuk Small Medium Business Administration[SMBA](No. 2001132433-0861)
- 2001. 11 Achieved a prize of [2002 Energy Winner](#) in Green Industrial Equipment and Appliance by Consumers Korea[former CACPK]

### ▷ 2000 History

- 2000. 08 Acquired [CE certification](#) for USP models(USP-1000, 900, 500, 300)
- 2000. 09 Received a prize of [16th Kyunghyang Daily Newspaper's Electric & Energy](#) from Minister of Ministry of Commerce, Industry and Energy[MOCIE], CEO of Korea Electric Producer Corporation[KEPCO] and CEO of Kyunghyang Daily Newspaper

- 2000. 10 Designated as [Prospective Export Business](#) by Export Assistance Center in Daegu-Gyeongbuk Small and Medium Business Administration[SMBA] (No. 2000-119)
- 2000. 11 Installed [Ultrasonic Fish Deterrent Device\(USP-FDD\)](#) into Haripur 365MW combined cycle power plant in Bangladesh
- 2000. 12 Designated Ultrasonic Poswer Supply System(for dyeing machine) as [Exellent Equipment for energy saving](#)
- 2000. 12 Designated the company for millitary service from Millitary Manpower Administration

#### 1999 History

- 1999. 06 Foundation of [Morko Co., Ltd.](#)
- 1999. 11 Read a paper in [14th Energy Saving Technology Workshop](#) (Energy Saving by using Ultrasonic Scale Preneter(USP))
- 1999. 11 Obtained approval for [Venture Business](#) from Daegu-Gyeongbuk Small Medium Business Administration[SMBA](No. 1999132535-0289)
- 1999. 12 Participated in [99 Korea Patent Exhibition](#)(Received a prize from Commissioner of The Korean Intellectual Property Office)

Additional delivery of USP to the chemical plant in Taiwan(attached photo)

글쓴이 : 관리자 날짜 : 06-08-25 11:35 조회 : 1513

Before

After

The effect of USP that was installed to the plate type heat exchanger in the chemical plant in Taiwan in April is confirmed, so that the additional delivery is determined.

It is thought that this results from customers' kindness and interest, so we promise to research and develop more and more, and then to recompense the customer with a good quality of products.

→ 회사소개

고객여러분,  
초음파전문기업 몰코에 오신 것을 환영합니다.

- 강력초음파분야 세계 일등기업 추구
- 지속적인 연구개발 -국가발전에 기여
- 인류를 위한 노력 -더불어 사는 나눔의 실천

당사는 강력초음파 이용기술을 연구개발, 생산, 수출하는 초음파 전문 중소 벤처기업으로 초음파의 동력적 에너지를 이용하여 산업전반의 에너지 절약, 환경개선, 공정 및 품질 개선 등의 연구와 IT, BT, NT, ET분야의 신 기술 개발과 블루오션 분야의 개발, 특히 러시아와의 기술 협력관계를 맺고 강력초음파 분야의 세계적 선도기업을 목표로 전 임직원이 혼신의 힘을 다하고 있는 기업입니다.

에너지 절약과 환경보호, 품질개선, 공정개선 등 강력초음파의 이용범위가 점차 확대되고 있으며 특히 고유가로 인한 기업경영여건의 악화와 기후변화협약, 및 환경규제에 따른 제약이 날로 증가되고 있는 시기에 당사는 강력초음파의 이용 기술을 연구개발하고 보급함으로써 국가경제에 기여하고 기술발전에 일조하기 위한 강력 초음파의 신기술개발에 전 직원이 혼신을 다하고 있으며 나아가 나눔을 실천하는 세계적인 선도기업이 되기 위하여 노력하고 있습니다.

많은 격려와 도움을 부탁드립니다.

이 승 구

COMPANY INFO.

- 회사명 (주) 몰코 Morko Co., Ltd. 설립 : 1999. 6. 1
- 대표자명 이 승 구 Lee Seong Goo
- 주 소 (704) - (806) 대구시 달서구 본동 607번지
- 연락처 전화 053-634-5893, 633-5893 팩스 053-642-5893
- 업 종 제조, 무역 자본금 : 4억 5천만원
- 주요생산품 초음파스케일방지, 강력초음파장치
- 사업자등록번호 514-81-38203

Additional delivery of USP to the chemical plant in Taiwan(attached photo)

글쓴이 : 관리자 날짜 : 06-08-25 11:35 조회 : 1514

Before

After

The effect of USP that was installed to the plate type heat exchanger in the chemical plant in Taiwan in April is confirmed, so that the additional delivery is determined.

It is thought that this results from customers' kindness and interest, so we promise to research and develop more and more, and then to recompense the customer with a good quality of products.

Additional delivery of USP to the chemical plant in Taiwan(attached photo)

글쓴이 : 관리자 날짜 : 06-08-25 11:35 조회 : 1514

Before

After

The effect of USP that was installed to the plate type heat exchanger in the chemical plant in Taiwan in April is confirmed, so that the additional delivery is determined.

It is thought that this results from customers' kindness and interest, so we promise to research and develop more and more, and then to recompense the customer with a good quality of products.

Exhibiting USP in "Korea Invention Patent Exhibition 2007" and awarded "WIPO AWARD"

글쓴이 : 관리자   날짜 : 07-12-13 14:17   조회 : 1754

Our products was chosen for exhibited products, since we applied to exhibit with a patent( Ultrasonic system for removing and preventing fouling in an explosion-proof area) in Korea Invention Patent Exhibition 2007. So we exhibited our products and technology in "Korea I nvention Patent Exhibition 2007". And we also awared the prize named "WIPO(World Intelle ctual Property Organization) AWARD".

Additional delivery of USP to the chemical plant in Taiwan(attached photo)

글쓴이 : 관리자   날짜 : 06-08-25 11:35   조회 : 1514

Before

After

The effect of USP that was installed to the plate type heat exchanger in the chemical plant in Taiwan in April is confirmed, so that the additional delivery is determined.

It is thought that this results from customers' kindness and interest, so we promise to research and develop more and more, and then to recompense the customer with a good quality of products.
