VISIT **FREE DOWNLOAD** FROM the **SERVER** databank:
http://www.mastersonic.com/documents/

**NO HARMFUL FILES. YOU WILL NOT EXPERIENCE ANY PROBLEM WHEN
DOWNLOADING AND OPENING FILES FROM MPI SERVER**

There are many movie files on the server. First download the complete
document to your PC, and than activate the movie file (this way you will
save a lot of time).

> **For reading the files you will need Acrobat Reader 6 (Download Acrobat
> Reader 6 from: http://www.adobe.com/products/acrobat/readermain.html)**

If it happens that you could not open some of the links (which are longer than 80 characters) they may be getting wrapped onto 2 or more lines in your contact's mail software - If so please copy the individual lines and paste them into the address bar on the browser.

Other than that, the first thing to suggest would be to contact your IT support in case of doing something wrong or maybe there are any limitations in place about what you can access.
